

## EDITORIAL

### Dear Readers,

**A**t this time of the year when Swine Flu panic is travelling faster than anything else in the country we as homeopaths have a big responsibility to take care of. Yes, I said Swine Flu Panic and not Swine Flu disease per se because the reality of the situation is this only that it is more of a panic than the actual disease spread. The emails, sms doing the rounds that Influenzinum 200 is a sure shot preventive for Swine Flu. Every now and then I have been getting phone calls from patients, friends and relatives with this query for Influenzinum to be taken or not as a preventive. 'No' was my answer to all of them and this is what we need to guide people about, that don't take any such thing but the moment you come down with any symptoms, see your homeopath. The Genus Epidemicus in Pune was Arsenic album and Bryonia. If a patient

Epidemicus will cover only 70% of the cases rest of the patients will still reflect their own individuality and show symptoms of a different remedy. Follow this and you and your patients both will be safe rather than leave them with Influenzinum.

Coming back to our HB and its contents, we have a paradigm shift happening in HB from this month onwards. We have widened our scope from just for students to students, doctors, patients and lovers of homeopathy. We have been getting queries, suggestions and readers asking for different subjects in HB. Keeping all that in mind now HB widens its horizon to quench the thirst of many more readers with articles for students, for doctors on management part of various diseases through homeopathy, for lovers of homeopathy to understand the scope of homeopathy in a better way, a new column on how other therapies like Naturopathy, Reiki, Yoga, Acupressure, etc. can be used by

awareness information, medical and homeopathy news and lots more. If there is some therapy which is beneficial for the patient in real sense, we should be open to it and not restrict ourselves to the realms to our own clinic only. This is the idea behind starting a section on benefits of other therapies. It is a time of when we all have to accept and recognize the role of Integrative Medicine, this is how other pathies will also become open to our science and in turn we will benefit from each other. We will have 'Queries section' where queries from students, doctors and readers will be discussed and we will have our senior homeopaths on Board answer these queries. This month had Children Safety week falls from 1<sup>st</sup> September to 7<sup>th</sup> September so we have covered the same topic for this issue and have most of our articles are on management of children's problem through homeopathy. There is a special article covering the burning topic of Swine Flu where Genus Epidemicus aspect of swine flu has been covered by Dr. Ajit Kulkarni. Hope you like this collection. Do send us your feedback about the articles and this change which has been especially brought about on demand of our readers.

**GENUS EPIDIMICUS WILL COVER ONLY 70% OF THE CASES REST OF THE PATIENTS WILL STILL REFLECT THEIR OWN INDIVIDUALITY AND SHOW SYMPTOMS OF A DIFFERENT REMEDY. FOLLOW THIS AND YOU AND YOUR PATIENTS BOTH WILL BE SAFE RATHER THAN LEAVE THEM WITH INFLUENZINUM.**

comes with presentation of Swine Flu symptoms, you can think of these two remedies at first but give only if the symptoms match. Genus

doctors to complement their prescription. Don't forget our ultimate aim is to cure the patient and treat the patient, current issues
