

**Dear Readers,**

**T**he LM Potency is the posthumous revelation of Dr Hahnemann's work. In the later years of his life, Hahnemann had supposedly worked on finding a better way of dispensing the medicines when he devised the LM potency. The process has been given in detail in the aphorism 270 and its footnote in the 6th edition of the Organon. Hahnemann's Organon translated by Wenda O Reilly gives a much clearer picture of the procedure and the process that Dr Hahnemann has explained. No doubt that the said translation is considered to be the best and most precise translation of the 6th Edition of the Organon of Medicine.

To a question as to how can small doses of such very attenuated medicine as homeopathy employs still possess a great power, Hahnemann has answered as follows: *"That is the preparation of the homeopathic medicinal attenuations, a small portion of medicine is not merely added to an enormous quantity of non- medicinal fluid, or only slightly mingled with, as in the above comparison, which has been devised in order to bring ridicule upon the affair, but, by, the succussion and trituration, there ensues not only the most intimate mixture, but at the same time, and this is the most important circumstance – there ensues such a great, and hitherto unknown and underwent of change, by the development and liberation of the dynamic powers of the medicinal substance so treated, as to excite astonishment ."*

*"The mode of attenuating practiced in homeopathy effects not only as equal distribution of the medical drop throughout a great proportional quantity of unmedicinal fluid (which is out of question in the above absurd comparison), but it also happens – and this is of infinitely greater importance – that by succussion and trituration employed, a change is effected in the mixture, which is so incredibly great and so inconceivably curative, that this development of the spiritual power of medicines to such a height by means*

*of multiplied and continued trituration and succession of a small portion of medicinal substance with ever more and more dry or fluid unmedicinal substances, deserves incontestably to be reckoned among the greatest discoveries of this age."*

Therefore homeopathy seems even beyond the nanotechnology of today. When you read the latest work of nanotechnology and see the reason why they are working on smaller particles, the reasons given are the same which Hahnemann gave 200 years back, that is, to reduce the side effects of the medicines and to have their effect in beneficial ways. I strongly feel that few years down the line, homeopathy will have the respect and the status it deserves, if we all keep working in the direction of practising the right way, with documentation and contribute in the research of quantum physics by supporting such causes, donations and helping such organizations doing this work.

In this month of Hahnemann's birth anniversary, we have many interesting articles on the theory and practice of LM or 50 Millesimal potency. Dr Harsh Nigam has given the theory of preparation of LM potency and Dr Brian Kaplan has given the reasoning why at all Hahnemann devised LM Potency and has given its benefits as compared to the lower and higher potencies. We have reproduced a chapter from the book 'Samuel Hahnemann, His life and Works' by Richard Haehl, where there is an interpretation of Dr Hahnemann's personality done by a specialist by studying his skull structure, hand structure and his handwriting. It is a very interesting paper and we hope you would be happy to know more about the personality of the very person because of whom you are a healer rather than just a doctor.

Send your thoughts and comments for this issue.
